

# RINCO

## Converter Transducer

20Khz

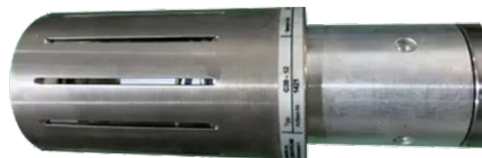

## Technical Data

◆ Modal	C20-12
◆ Brand	Rinco
◆ Technology	Ultrasonic
◆ Accuracy	Good
◆ Efficiency	Excellence
◆ Frequency	20Khz
◆ Power	2000Watt
◆ Weight	2.1 - 2.4 kg

## Features

- ◆ Genuine Rinco OEM replacement converter
- ◆ Optimized for 20 kHz frequency with 2000 W output
- ◆ Excellent vibration stability for strong, precise welds
- ◆ High thermal endurance for continuous production
- ◆ Durable construction and low-maintenance design

## Description

- ◆ We offer the **Rinco Converter / Transducer C20-12**, a premium OEM replacement part engineered for Rinco ultrasonic welding systems. Designed for high efficiency and long-lasting performance, this converter ensures exceptional energy transmission, stable vibration output, and consistent weld quality in demanding industrial applications such as ultrasonic welding, sealing, and cutting.
